

国際シンポジウム「パークマネジメントの未来」
May 14-15, 2013, Tokyo, Japan

Design Legacy Significance:

- The significance of The Strive - the "Design Legacy" concept, is not:
 - just the architectural form and design
 - that the building has a historic (as well as expressed by one of the original architects) and it is still being adapted and explored in a design sense today - "inherent embedded capacity"
 - just exceptionally placed in the landscape and surrounding park as it forms an engaging welcome to the entrance to the City along Swanston Street.
